Carlon SuperBlue® Boxes combine the features of the hard shell thermostet box and the thermoplastic PVC style box to create a “new” rigid non-metallic wiring box. Molded out of specially formulated thermoplastic material, Carlon SuperBlue® boxes are so strong they won’t crack or break in extreme environments. So rigid, they resist flexing and hold their shape even in the worst applications. The boxes are designed to nest inside each other to take up less space on the shelf or in the truck, while still providing the largest wirefill capacity in their class.

- All PVC boxes are listed to UL514C
- All PVC boxes are listed for masonry walls
- All PVC boxes are UL. Classified for 2 hr. fire wall and/or fire ceiling
- All PVC boxes meet NEMA OS-2
- All PVC boxes are permissible for use with 90 degree C conductors
- UL File E11461 and R9140
